WORLD CLASS IN IMAGING AND COATING TECHNOLOGY

## RESEARCH & DEVELOPMENT

Leading specialists in the formulation of complex web-coated layers using the latest in nanoparticle technology. These layers can contain active compounds which are tailored to meet the requirements of a range of industries. Developers of water-soluble dyes with intense and stable colours for imaging applications such as home and professional printing.

## MANUFACTURING & TOLL COATING

High-speed, multi-layer coating with powerful, but mild drying including complex emulsions sensitive to handling. A highly automated finishing facility which can manage a range of formats and packaging options to meet the needs of the market.

## SUPPLY CHAIN

Global supply chain that offers a highly efficient inventory management and distribution service. Advanced logistics including collaborative planning, forecasting and replenishment can be tailored to meet the requirements of different types of customers and sectors.

## SALES & MARKETING

A professional team that manages a global brand and can work in collaboration with a range of different customers. Offers an insight into changes in market trends, new product or application opportunities and the development of market initiatives.

# ILFORD WORLD CLASS IN IMAGING

## HERITAGE

One of the greatest challenges for any manufacturer in today's world is the ability to monitor and respond to the changing technologies and trends in the marketplace. In order to be able to meet these demands, manufacturers have to have the experience, flexibility, and the technical competence to stay at the forefront of their field. As one of the oldest photographic companies in the world, ILFORD has faced and conquered many challenges including the revolutionary transition from traditional analogue to digital technology. ILFORD can now claim its position as one of the market leaders in the professional inkjet arena.

Since inception in 1879, ILFORD has nurtured and developed a world-class brand that is still renowned within the photographic arena.

Experience is paramount and ILFORD has used its knowledge to fine-tune its core competencies and the company excels in complex dye development, innovative media manufacturing and highly intricate multi-layer coating technology.

As a result, ILFORD is one of the only companies in the world to offer integrated research and development initiatives for dyes, inks and coated media and is therefore able to offer its customers a 'best in class' solution for producing outstanding photographic images.

Based at its world-class manufacturing facility in Switzerland, the research and development team continue to develop technical building blocks to ensure that ILFORD can respond directly to any step change in technology.

## BEST IN CLASS

ILFORD is able to coat extremely fine layers onto different substrates to the highest quality and consistency for both the imaging and non-imaging industry.

Today, ILFORD is proud to be working with blue chip companies from within the imaging sector as well as building relationships with global businesses from outside the industry. The new global partners are utilising the coating capability that ILFORD has to offer to develop leading-edge components which form part of innovative product development programmes.

The Swiss facility also boasts coating and finishing technology that plays a key role in ensuring that ILFORD is recognised as a leader in its field.

The highly automated finishing facility further extends the company's capabilities as it is able to supply a range of packaging options to meet customer demands.

ILFORD is able to offer its customers a tailor-made solution to match their requirements and its professional approach has put the company in a strong position with an enviable customer portfolio.

## CUSTOMER FOCUSED

ILFORD supplies photo quality inkjet media to Original Equipment Manufacturers (OEMs), leading photographic dealers, wholesalers, commercial and graphic specialists and mass retailers, allowing professionals and amateurs alike to produce quality photographic images around the world.

ILFORD prides itself on offering a professional, customer focussed approach to its multi-channel business. ILFORD tailors its services to meet the expectations and demands of the individual customer drawing upon its strengths in supply chain, technical support and sales and marketing.

The ethos of the company is to ensure that a 'best in class' approach permeates into all areas of its business to enable ILFORD to provide its customers the very best that the industry can offer.

The ILFORD brand has been synonymous with professional quality photographic material for many years and continues to move from strength to strength in the digital imaging age. The range of brands available has been developed in line with the requirements of the individual markets and the products have been designed accordingly.

## ILFORD GALERIE PROFESSIONAL INKJET PHOTO RANGE

GALERIE has become the number one choice for professional photographers and aspiring amateurs looking for a truly universal product compatible with all high-end inkjet printers in the market. Utilising the latest coating technology, the range takes inkjet photo printing to the next level in terms of quality, gamut, longevity and stability. Encompassing Gold, Smooth and Classic, the range offers premium quality solutions from 4x6" sheets up to 60" wide rolls.

## ILFORD GALERIE PROFESSIONAL INKJET PHOTO RANGE GRAPHIC

As with all businesses today, the professional photographer is looking at ways to drive incremental revenue by offering a range of additional services that utilises existing equipment. GALERIE Graphic has been developed specifically to meet that requirement. The range of additional products, including display films, backlit products and materials to create pop-up displays and X-frames, are all compatible with the latest inkjet technology available in the marketplace today.

## ILFORD OMNIJET COMMERCIAL INKJET MEDIA RANGE

The commercial marketplace continues to be demanding in terms of speed, quality and universal compatibility. The OMNIJET products have been developed with these specific needs in mind. The range has been tailored to particular applications and to the requirements of the commercial print for pay market.

## ILFORD biomedia MEDIA FOR YOU AND THE ENVIRONMENT

A range of environmentally-friendly products designed with no compromise in quality or performance. Both recyclable and biodegradable, BioMedia uses a unique enzyme to accelerate the breakdown of the product under landfill conditions ensuring the environmental impact of the media is minimised.

## ILFORD ILFOCHROME MICROGRAPHIC

ILFOCHROME MICROGRAPHIC FILM is a unique archival recording film capable of storing both optical and digital data for over 500 years.

## ILFORD INKJET PHOTO PAPER RANGE

The fast-moving consumer marketplace demands products that are adapted to the needs of the customer and the ILFORD Inkjet Photo Paper range is no exception. Using the latest 'out of the box' technology, the products can be used in any inkjet photo printer on the market today and achieve great looking prints. Using the industry standard good, better, best categorisation, the range offers quality products to suit all customers' needs whatever their final application.

## ILFORD STORE BRAND SERVICES

The growth of digital image capture has seen an increasing demand for inkjet media by the consumer. As one of the leading manufacturers of inkjet media, ILFORD is able to offer its services and experience in developing a bespoke product range for this market.

## ILFORD ILFOCOLOR

ILFOCOLOR display films are optimised for digital exposure where high quality photographic output is a must.
